

RRSS Risk List

Risk ID	Date Identified	Headline	Description	Type	Impact	Probability	Magnitude	Owner	Mitigation Strategy
1	10.04.2024	Dependency discontinuation	Relied on open source software stops being developed.	I	5	13%	0.7	Mete Uysal	Find an equivalent dependency that is well maintained.
2	12.04.2024	Changing dependencies	Instructors makes us use different technology and tools during the development s	I	4	86%	3.4	İlker Avcı	Learn the new technologies and tools.
3	12.04.2024	Timetable mismatches	Time table of the group members don't match, and it causes communication probl	D	4	71%	2.8	Furkan Şimşekli	Find a common free time using scheduling tools such as crab.fit or when2meet
4	13.04.2024	Lack of expertise	There aren't any expert group members on the Spring Boot.	D	3	100%	3.0	Everyone	Learn Spring Boot.
5	13.04.2024	Github outages	3rd party issue tracker and version control system locks out developers.	I	4	12%	0.5	Buğra Kağan Acar	Create local git patches and send them via email to a team member who has access to Github.
6	13.04.2024	Supply chain vulnerabilities	A severe security flaw arised on one of the software dependencies.	I	5	4%	0.2	Mete Uysal	Roll back to an older version which doesn't include the vulnerability.
7	13.04.2024	Missed deadlines	A group member doesn't finish his documentation task before the deadline.	D	4	14%	0.6	Depends	Don't miss the deadline.
8	14.04.2024	Changing expectations	The project's scope could expand beyond what was initially planned, leading to delays and increased costs.	I	4	11%	0.4	Furkan Şimşekli	Establish clear boundaries upfront, closely monitor changes, and involve stakeholders in decision-making throughout the project.
9	14.04.2024	Performance problems	Performance bottlenecks arise during high user load.	D	5	6%	0.3	İlker Avcı	Employ load balancing technologies.
10	14.04.2024	Platform's reputation for poor reviews	If the products listed on the platform receive consistently poor reviews, it could affect the platform's reputation.	I	1	34%	0.3	Eyüp Menevşe	Implement rigorous quality checks, actively seek customer feedback for improvements, and promptly address any issues raised.
11	14.04.2024	Complicated user interface	Users might find the user interface unintuitive.	I	2	9%	0.2	Eyüp Menevşe	Change the user interface according to the feedbacks.
12	14.04.2024	Lack of scalability	Inadequate infrastructure or poor design choices could hinder the platform's ability to handle increased traffic as it grows, leading to performance issues.	D	5	7%	0.4	Buğra Kağan Acar	Plan for both horizontal and vertical scaling options to accomodate growth.
