RRSS Software Test Report

1. Introduction

1.1 Purpose and Scope

This document's purpose is to provide a comprehensive summary of the RRSS project

1.2 Descriptions and Abbreviations

STR Software Test Report

RRSS Review and Rating System for ShopSmart

2. Descriptions of Test Activities

2.1 Document Security

This document is prepared for the stakeholders of the RRSS project and access is limited to only the stakeholders and not public. This document can be edited by the FOSSKeeters team and only they are authorized to access the document through Google Docs. The stakeholders will be notified in case of a security breach of any kind.

This document is valid until the end of the BBM384 class term(2024).

2.2 Data Recording, Reduction and Analysis

Testing of the RRSS is done manually and the testing of the project is detailed in the test case definitions document.

3. Test Preparation

3.1 Hardware Preparation

All the testing done on a desktop environment with a reliable internet connection.

3.2 Software Preparation

Testing is done with a client run on a Fedora Linux Workstation 40 operating system, running Mozilla Firefox Version 126.0 (64-bit) browser.

Software Test Report	Date: 2024.05.23

4. Test Results

Use Case Number	Use Case Name	Test Case Description File Name	Retest?	Number of Activity Paths Tested	Number of Non-working Activity Paths	The time spent(in minutes)
1	Register	Tests whether an empty credential is rejected. Tests whether an existing user trying to register rejected. Register with correct credentials.	yes	3	0	5
2	Login	Tests whether an empty credential is rejected. Tests whether wrong credential is rejected. Tests whether a correct credential is accepted	yes	3	0	4
3	Manage Account	Tests whether the actors can change their profile pictures with valid images. Tests whether the actors can change their profile pictures with invalid images Tests whether the actors can change their email addresses with valid inputs Tests whether the actors can change their email addresses with invalid inputs Tests whether the actors can change their name and surname	yes	5	0	6

RRSS	Version: v1.0
Software Test Report	Date: 2024.05.23

4	Manage Product	Tests that an actor can successfully add a new product with valid information. Tests that an actor can modify the description of an existing product. Tests that the actor receives a confirmation prompt before deleting a product. Tests that the system prevents adding a new product with a missing required field.	yes	4	0	9
5	Manage Review	Tests whether an empty review is rejected. Tests whether a valid review can be created or not. Tests whether a duplicate review is rejected or not. Tests whether a review can be edited or not. Tests whether others' reviews can be edited or not from a non-administrator account. Tests whether others' review can be edited from an administrator account. Tests whether a review can be deleted or not.	yes	9	0	2

RRSS	Version: v1.0
Software Test Report	Date: 2024.05.23

		Tests whether others' review can be deleted or not from a non-administrator account. Tests whether others' reviews can be deleted from an administrator account.				
6	Manage Topic	Tests whether an empty topic is rejected. Tests whether a valid topic is accepted. Tests whether an unauthorized user can edit the topic.	yes	3	0	8
7	Manage Topic Entry	Tests whether an empty entry is rejected. Tests whether a valid entry is accepted. Tests whether an entry can be edited by unauthorized actor. Tests whether an entry can be edited by authorized actor. Tests whether an entry can be deleted by unauthorized actor. Tests whether an entry can be deleted by authorized actor.	yes	6	0	3
8	React to Review	Tests whether the actors can give reactions to reviews	yes	6	0	1

RRSS	Version: v1.0
Software Test Report	Date: 2024.05.23

		Tests whether the actors can give reactions to reviews Tests whether the actors can undo reactions to reviews Tests whether the actors can undo reactions to reviews Tests whether the actors can revert reactions to reviews Tests whether the actors can revert reactions to reviews				
9	Search Product	Tests whether an empty search is correctly rejected or not. Tests whether a basic search with just a name query works. Tests whether a basic search with just filters works. Tests whether search with a name query and filters works.	yes	4	0	7
10	Send Password Reset request	Tests whether empty email field is accepted when sending password reset request. Tests whether valid email field is accepted when sending password reset request. Tests whether invalid email field is accepted when sending password reset request.	yes	3	0	4

RRSS	Version: v1.0
Software Test Report	Date: 2024.05.23

11	Manage Wishlist	Tests adding a new product to wishlist. Tests adding already existing product to wishlist. Tests removing existing product from wishlist. Tests deleting non-existing product from wishlist.	yes	4	0	2
12	View Analytics	Tests the view when there are no products to be shown in analytics page Tests the view when there are products to be shown in analytics page	yes	2	0	3
13	Reply to review	Tests whether an empty reply is rejected. Tests whether a valid reply can be created or not. Tests whether a duplicate reply is rejected or not. Tests whether a reply to other merchants' product reviews are rejected or not. Tests whether a reply can be edited or not. Tests whether other merchants' replies can be edited or not. Tests whether other merchants' replies can be edited from	yes	10	0	2

RRSS	Version: v1.0
Software Test Report	Date: 2024.05.23

		an administrator account Tests whether a reply can be deleted or not. Tests whether other merchants' replies can be deleted or not. Tests whether merchants' replies can be deleted as an administrator.				
	TOTAL	62		62	0	56

4.1 Criteria for Evaluating Results

The criteria for evaluating results aim to assess the effectiveness and functionality of the system based on test documentation. Specifically, we evaluate our work based on the following criteria:

- Achieving comprehensive functional test coverage.
- Ensuring successful outcomes from functional tests.
- Completing functions within milliseconds to avoid delays.
- Preventing crashes through robust exception handling, which should effectively manage unexpected situations and predict user actions.
- Displaying warning messages when issues arise in exception handling.
- Providing a user-friendly experience that is easy to navigate and understand.
- Identifying and addressing significant and obvious bugs.
- Retesting and verifying bug fixes to ensure issues are resolved.
- Ensuring that the desired process outcomes are visible and clear through the interface.
